## MEDICAL RESERVE CORPS

### COVID-19 Vaccination Impact Report

DECEMBER 14, 2020 - JUNE 30, 2021

## VOLUNTEER VACCINATION HIGHLIGHTS

### UNPRECEDENTED SURGE OF VOLUNTEERISM

During the COVID-19 response, the Virginia Medical Reserve Corps launched the largest ever mobilization of nearly **14,000 volunteers** to support the Virginia Department of Health. Many community vaccination clinics required the support of over 800 volunteers for a sustained periods of 4 months or more. VA MRC's remarkable ability to deploy a qualified mass vaccination volunteer workforce, assisted Virginia in being the only Southeastern state to vaccinate 70%+ of all adults with at least 1 dose.

### HEALTHCARE FACILITIES

As vaccine supply increased, VA MRC vaccinators and general support volunteers deployed to augment hospitals, long-term care facilities, free clinics and pharmacies. The VA MRC supported 19 public and private health care facilities during the COVID-19 Mass Vaccination equating a monetary value of **\$376,200**.

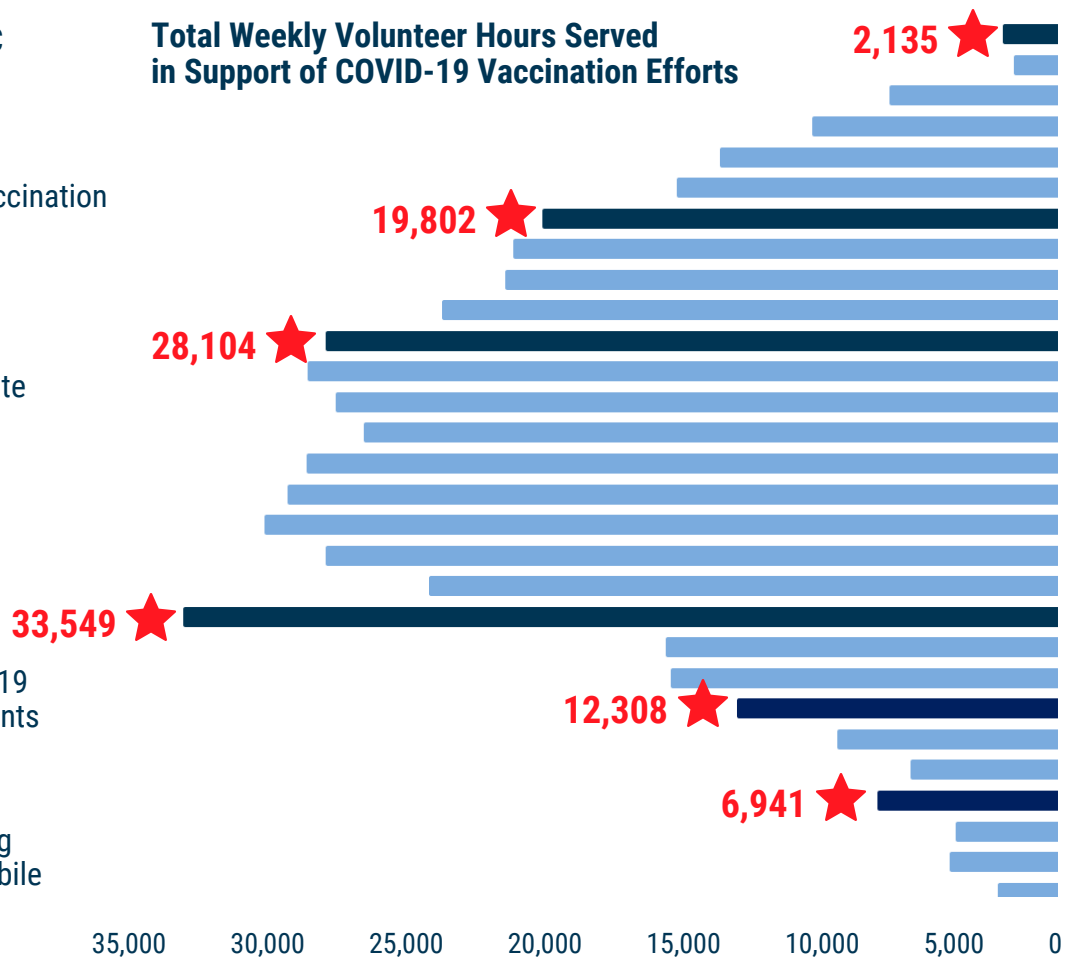

### VULNERABLE POPULATIONS

In support of local health districts, VA MRC volunteers are engaged in targeted vaccination and outreach efforts for vulnerable population. Volunteers are administering the COVID-19 vaccine to immigrant, homeless and economically disadvantaged community members.

## VOLUNTEER VACCINATION MOBILIZATION

- ★ DEC 14** First deployment of VA MRC volunteers for COVID-19 vaccination response
- ★ JAN 25** Large closed community vaccination clinics opened for Phase 1B vaccination
- ★ FEB 22** The eligibility of healthcare providers who could vaccinate was expanded
- ★ APR 26** Largest number of weekly hours of service occurred during Phase 2 vaccination
- ★ MAY 18** Began administering COVID-19 vaccine to high school students 16+ years old
- ★ JUN 07** Volunteers started supporting community outreach and mobile vaccinations

### Total Weekly Volunteer Hours Served in Support of COVID-19 Vaccination Efforts
